

Construction Software named one of Constructech's 50 hottest companies for 2009

PORTLAND, OR – July 15 – The Constructech 50 Hottest for 2009 is a listing of the most influential construction technology providers with a strong and ongoing market presence as determined by the editors of Constructech magazine with assistance from its editorial advisory board.

Viewpoint was selected out of more than 200 companies for its growing presence in the marketplace and finding success despite a tough economic climate. Selection criteria also included customer satisfaction, product capabilities and dedication to the construction industry through education and outreach efforts.

About Viewpoint Construction Software:

In 2008, 68 successful contractors made the switch to Viewpoint, a 28% increase over 2007's record year of new customers. As of June 2009, Viewpoint is proud to call over 15% of the ENR 400 part of its customer base and, in spite of a challenging economic environment, Viewpoint has added over 25 new customers to its growing customer base.

For more than 30 years, Viewpoint Construction Software™ has been delivering innovative enterprise software utilizing high-performance technology, products and support. Viewpoint V6 Software® is the fully-integrated SQL / .NET solution tailored specifically for mid- to large construction companies linking accounting, operations and project management with the power of real-time results to help increase efficiency and profitability.
