

Viewpoint Construction Software on track after Q3 for record year as key contractors position themselves for rebound.

PORTLAND, OR – October 27– Demand for Viewpoint Construction Software’s contemporary ERP solution on SQL / .NET Platform continued its record pace for winning new customers and a record year with several significant additions in Q3.

Three of these new customers are leading Canadian Contractors – Chandos Construction, Marco Group and Baseline Constructors. Introduced in late 2008 to the Canadian Market, Viewpoint V6 Software is quickly attracting attention of progressive Canadian contractors seeking a rock-solid ERP solution.

The largest new addition is premier Northwest General Contractor Howard S. Wright with annual sales of \$900+ million. Other US companies partnering with Viewpoint to integrate their finance and operations include B&D Industries, Geeding Construction, James W. Fowler Company, Parkway Construction & Associates, Pearson Construction, Tri-Technic Inc. and others.

Progressive contractors serving the General Contracting, Heavy/Highway and Specialty/Sub markets focused on operating more efficiently are looking at Viewpoint to integrate their company and provide real-time business intelligence. Facing tighter construction budgets, effectively managing profitability is important now more than ever. Contractors are increasingly taking advantage of resources available during slower times to implement technology critical to long-term survival.

About Viewpoint Construction Software:

With a long-standing focus on meeting the information needs of mid to large-scale organizations, Viewpoint has achieved a leadership position in construction enterprise software. Built on a contemporary and scalable Microsoft .Net platform, the firm provides construction-specific solutions that address the unique needs of leading firms throughout the U.S., Canada and Australia.

Viewpoint works closely with its customers to gain specific insights necessary to evolve the software as industry conditions change. The result is software that is built to adapt and scale as customers’ business needs grow and change. Most importantly, it means providing an information platform as rock-solid as the foundations our customers build their roads, bridges and buildings upon.
