

Viewpoint Construction Software experiences second consecutive record year.

PORTLAND, OR (USA) – 2 March 2010– 57 leading construction companies, including several in the ENR 400, made the switch to Viewpoint V6 Software in 2009. Viewpoint offers the most modern SQL / .Net construction-specific solution tailored for mid to large US, Canadian and Australian Contractors. In addition to continued record growth in the U.S., with the addition of Bird Construction in Q4, Canada's 3rd largest General Contractor with offices coast to coast, combined with Marcos and Chandos Construction in Q3, V6 is now firmly entrenched in Canada. And thriving Western Australia contractor Perkins Builders' selection of Viewpoint V6 Software reflects the growing confidence down under as Viewpoint is fast becoming a global brand.

Key reasons top contractors are switching to Viewpoint V6 Software:

- Viewpoint's contemporary SQL / .NET platform that gives construction companies the ability to scale their operations without needing to add large IT infrastructures.
- True integration - connects accounting, job cost, operations, project management, and HR on a single database to minimize errors and foster collaboration. Everyone accesses the same information no matter where they're located.
- In a tough economy, V6 delivers the Business Intelligence to make smarter decisions on the fly and maximize tight profit margins.
- Forward thinking - already the most contemporary platform, the product roadmap for Viewpoint V6 Software reflects an unmatched commitment to investing in rapid innovation to keep up with the changes in how contractors operate.
- World class support and training. Over 80% of Viewpoint's customers rave about the quality of Viewpoint's application and technical support.

U.S. companies joining in Q4 include All States Materials Group, Blinderman Construction, Howell Construction, J Calnan & Associates Inc., Kelso Burnett Company, Martin Bros Construction, Mosites Construction Company, NANA Construction LLC, Paragon Contractors, Porter Brothers Inc., Talley Construction Inc., T J Lambrecht Construction, 3S Services, Schlouch Incorporated, Westcon, Inc., and Willamette Construction Group, Inc.

No longer the industry's best-kept secret, Viewpoint V6 Software is well positioned for significant growth in 2010 as forward-thinking contractors invest in modern technology to take advantage of the coming rebound. As increasing numbers of contractors of all sizes evaluate their technology platform, they're seeing how V6 delivers the comprehensive functionality they demand.

About Viewpoint Construction Software

With a long-standing focus on meeting the information needs of contractors of all sizes, Viewpoint has achieved a leadership position in construction enterprise software. Built on a contemporary and scalable Microsoft .Net platform, the firm provides construction-specific solutions that address the unique needs of leading firms throughout the U.S., Canada and Australia.

Viewpoint works closely with its customers to gain specific insights necessary to evolve the software as industry conditions change. The result is software that is built to adapt and scale as customers' business needs grow and change. Most importantly, it means providing an information platform as rock-solid as the foundations our customers build their roads, bridges and buildings upon.
